MUSEUM FÜR URGESCHICHTE(N) ZUG

“HEALTH!”
7000 years of the art of healing

Guided tour for groups

17. November 2019 to 17. May 2020

Next please!

Consultation-hour with the past

What is the connection between chewing gum and the health issues of the pile dwellers? And why did the Romans apply walnuts to their ears?
Our group tours will show you this and much more. Visit the waiting rooms of our ancestors together with "Dr. Dolor". Hear how operations were conducted in the stone age, what plants couldn't be missing from a roman apothecary, why images of saints were used to cure people and why cherry brandy used to be seen as medicine.
Including tasters!

Wouldn't this be the perfect programme for your next office outing or family celebration?
Book your preferred date now!

Group tours through the special exhibition

Duration:	approx. 1h
