## BIOGRAPHY

Swiss thrashers XONOR emerged during the pandemic, rapidly gaining a diverse global following through their unique sonic identity combining provocative lyrics with engaging song structures and hooks.

The fearsome foursome have come a long way since, playing at Kyiv's Destroyer Fest during the peak of Russia's invasion, playing with legends like Messiah, Nervosa, and Sodom and becoming one of TikTok's biggest thrash acts.

Their debut full-length album is currently in the works, to be officially announced in due time alongside a slew of live shows.

*"The debut slot may be thankless as a rule, but the four-piece are completely unimpressed by this and ensure the first mosh activities in the audience rows."*
